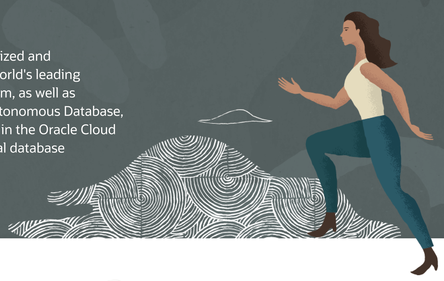
ORACLE

Why choose Oracle Database for all your data needs?

Oracle database products offer customers cost-optimized and high-performance versions of Oracle Database, the world's leading converged, multi-model database management system, as well as in-memory, NoSQL and MySQL databases. Oracle Autonomous Database, available on premises via Oracle Cloud@Customer or in the Oracle Cloud Infrastructure, enables customers to simplify relational database environments and reduce management workloads.



Reduce operational costs by up to 90%

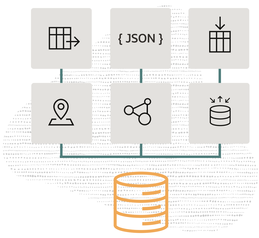
Reduce the costs of managing, securing, and maintaining your Oracle databases with machine learning-driven automation. Provision, scale and tune, protect and patch, and repair the database—all automatically without user intervention.

Guard against data breaches

Assess, detect, and prevent data security threats with Oracle database security solutions for encryption, key management, data masking, privileged user access controls, activity monitoring, and auditing. Reduce the risk of a data breach and simplify and accelerate compliance.

Use a single database for all data types

Free application developers from complex transformations and redundant data with Oracle's converged database.



Maximize the return on your investment

Independent analyst study shows how Oracle Autonomous Database offers significant savings and 417% ROI over five years, with only five months to payback.

Deploy where you need to

Deploy Oracle Database wherever required—in your data center, public cloud, or private cloud. This offers the flexibility between deployment in your data center when residency or latency are critical, or in the cloud when you want to take advantage of scalability and the broadest set of capabilities.
