

Supplementary Table 1. Information on the 170 traits that possess joint linkage at FDR = 10%. The “q-value-Joint” column gives the q-value for joint linkage, where a q-value is the FDR analogue of the p-value. In the “Cis” column, 0 denotes no cis linkage, 1 denotes cis linkage to the primary locus (locus 1), and 2 denotes cis linkage to the secondary locus (locus 2).

Trait	Chr	Start	Stop	Locus 1 Chr	Locus 1 Pos	Locus 2 Chr	Locus 2 Pos	q-value Joint	Cis
