

The future of open science is bright

arXiv Brand Guide

This document should be used by all members of the arXiv community to guide our visual representation and voice.

Contents

arXiv's brand journey	03
Logos	12
Brand pillars	15
Colors	16
Typefaces	18
Voice and language	20
Imagery and iconography	23

Strengthening arXiv’s brand is one way we can protect an open pre-print culture and keep arXiv free for everyone.

The purpose of this brand guide is to introduce how arXiv presents itself to the world, and make commonly used brand elements easy to access. From communicating with our global community, to how to use the logo, our guidelines for brand use allow us to maintain consistent quality and build a unified message without limiting creativity.

Your brand is what people say when you leave the room.

These quotes are from real arXiv users. Among many wonderful associations we heard some negative ones too: Confusion. Opacity. Neglect.

"Making the web interface more accessible is my top priority."

"Does anyone else think the arXiv logo is trying to take you to a rave in the 90's?"

"Half my friends are physicists. We think of arXiv as an ivory tower where all these decisions happen."

"The whole layout could really profit from a refresh sometime."

"stagnating, unclear, but fast"

"Cathedral of freedom."

"I would urge you to push the mobile layout even further."

"The home page could be much friendlier than the list of all possible arXivs"

"Yay arXiv!"

"Simply the best, arxiv is probably the best idea in the world of research"

"outdated design"

"The site looks terrible."

"I read the arXiv on a mobile phone while having breakfast. Would be great if there was a mobile friendly presentation of the pages."

"You dont want to get on the wrong side of arXiv. Because that means you are really stupid!"

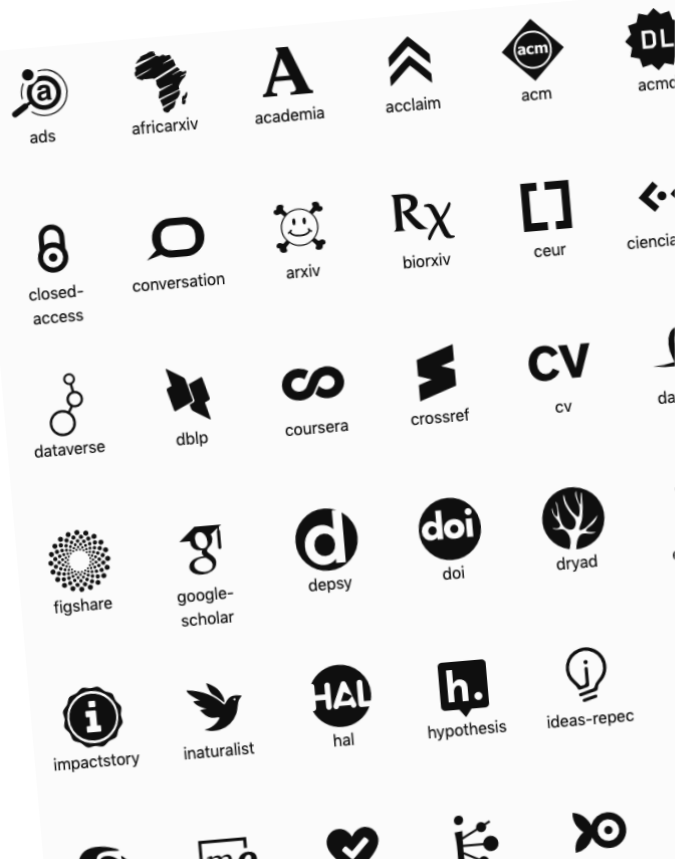

"Reading pdf articles on a smartphone is difficult."

"The site looks old."

"Please stay alive!!! We need you Arxiv.org!!!"

Finding the cracks in our identity

Ask yourself: Which of these logos would you trust with 1 million dollars?

3 reasons we must take action:

1. arXiv's visuals are inconsistent and project a sense of neglect.
2. Other services use our name and it is too generic for us to legally protect. This causes confusion and weakens our identity.
3. Despite arXiv's reliability and value, funders question our ability to deliver professional services.

DR. GREG MORRISETT,
DEAN OF CORNELL TECH

True Story:

Greg Morrisett: "I like seeing the red logo in my arXiv twitter feed each day."

arXiv team: "That's not arXiv's twitter feed. I thought the same thing at first. But that's just someone using our name and logo because we cannot protect it."

Greg Morrisett: "So... how quickly can we get the new branding on board?"

Pop Quiz! Which of these are run by arXiv?

- ☐ ArxivTools
- ☐ EarthArxiv
- ☐ AfricArxiv
- ☐ arXiv Daily
- ☐ PsyArxiv

- ☐ Lib arXiv
- ☐ Read arXiv
- ☐ My arXiv
- ☐ arXiv Zen
- ☐ arXivist
- ☐ arXiv Sanity Preserver
- ☐ arxiv-utils
- ☐ EdArXiv

A: none

Brand Research

To help us understand these myriad voices we gathered a diverse group of advisors—arXiv community members and design professionals—and worked with Cornell University in a six month collaborative process to shape our brand direction.

Pravabati Chingbangdam | Astrophysics, Indian Institute of Astrophysics

Lisa Glasser | Mathematical Physics, University of Vienna

Alberto Acommazzi | Astrophysics, ADS Program Manager

Jarvis Haupt | Electrical and Computer Engineering, University of Minnesota

Kara VanRoekel | Accessibility Consultant

Hideaki Takeda | Computer Science, National Institute of Informatics

Dmitri Krasny | Design Strategist

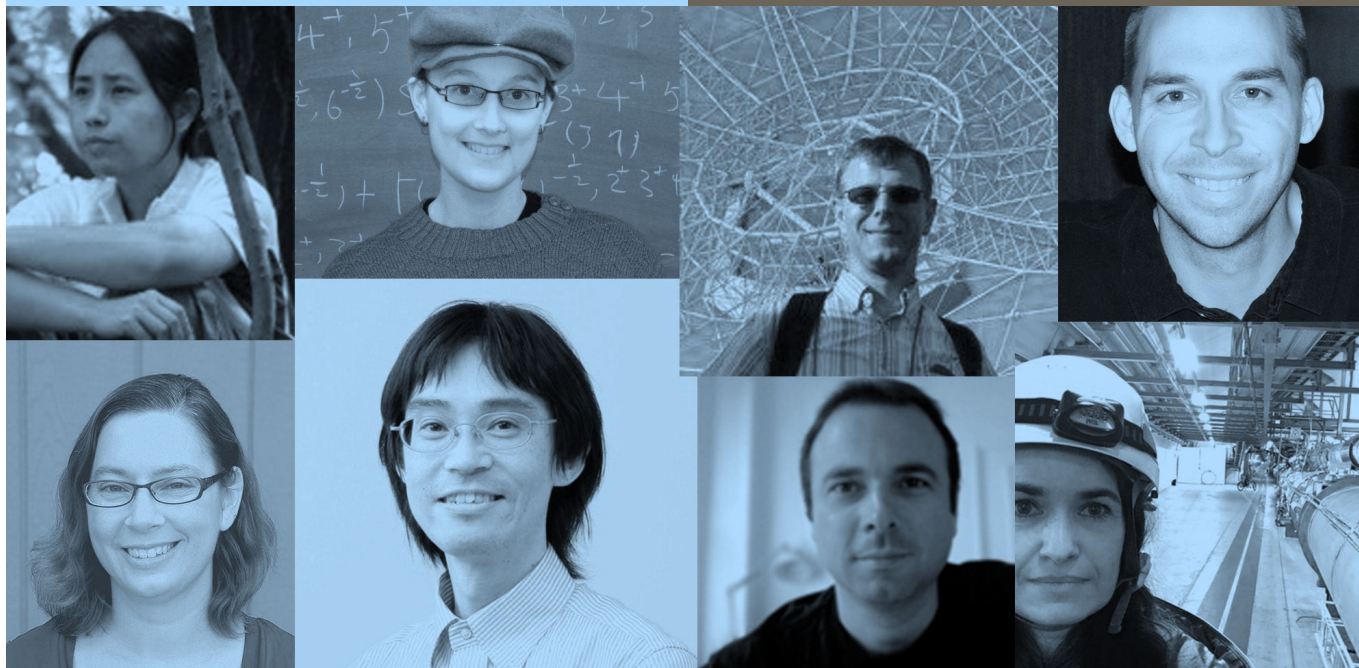

Ana Gondhino | Head of Communications & Outreach, CERN

With our advisory group we generated a list of attributes to measure and surveyed the community—and got over 7000 responses in 24 hours!

arXiv users really are the best.

The results were in...

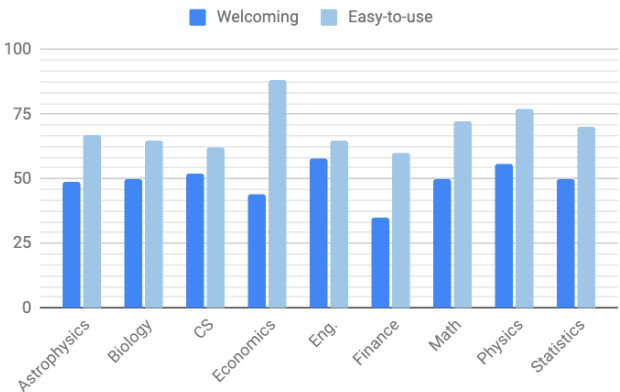

Our brand research showed that people have wildly different perspectives of arXiv. A strong identity, on the other hand, gathers people around a central touchstone.

Research Surprises

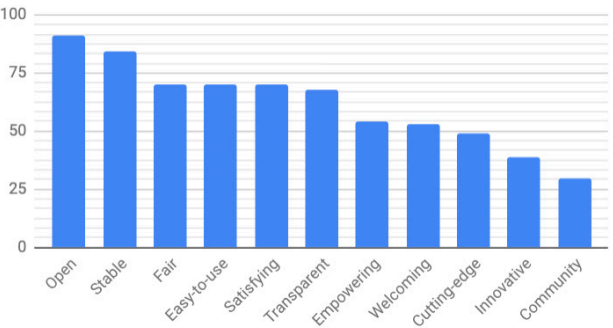

arXiv’s community is diverse and wide-ranging. In our research, we found that people close to arXiv -- board members, funders -- valued arXiv as a community but saw a need to bolster the infrastructure stability.

In contrast, the 7,000 users who responded to the survey expressed the opposite view: arXiv’s stability was perceived as strong, whereas community was not.

Essential, not enjoyable

arXiv provides essential value but is not welcoming or enjoyable to use. It leaves arXiv vulnerable to competitors and less able to protect a truly open pre-print culture.

“After months of using arXiv to browse I still don’t understand or use all the features the site offers.”

—arXiv user

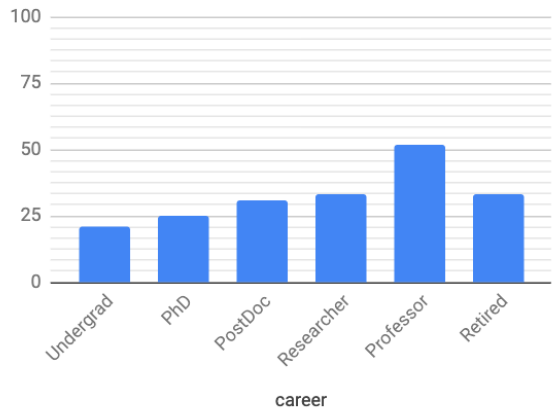

Community?

The Community attribute is not high for any group, and **on the wrong trajectory**: it’s lower for younger, newer arXiv users.

“Imposter syndrome! The website is opaque for beginners”

—arXiv user

Community

Our Northstar

Our core value in a few words

With help from the IAG we distilled our research into this northstar direction: **arXiv is a place of connection**, linking together people and ideas, and connecting them with the world of open science.

“arXiv is often the first place where researchers take action in open science.”

—Dr. Hideaki Takeda

arXiv is a place where ideas and people intersect, where people contribute and discover new research pathways, where knowledge itself turns corners.

A mark that fits

At the heart of every brand is a symbol that is identifiable, memorable, and legally defensible.

The difficult task of the brand mark is to be memorable and unique enough so that meaning can build over time.

Here is a sampling of arXiv's logo journey!

arXiv's current logo, plain text written out in a standard system font, was not unique enough to legally protect. We also wanted to go further and create a mark with potential for symbolic meaning.

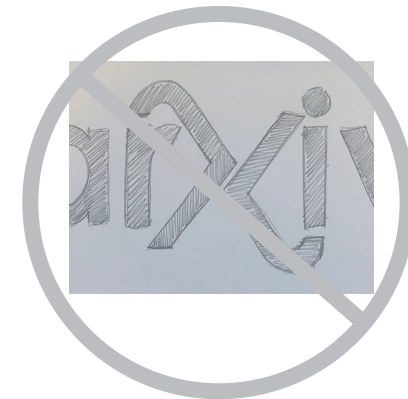

Too many other logos use alpha symbolism. It also held one too many messages (alpha and chi) which weakens its memorability. The designer Paul Rand would say "It's like wearing a belt AND suspenders".

Though it held potential the doorway symbolism was not immediately identifiable and memorable. Other directions were stronger.

This logo had the right concept of multiple elements coming together. But it needed improved legibility, visual harmony, and integration with arXiv's name. We also found an existing logo with a similar form so it lacked protectability.

This mark is legible and getting closer to our northstar. However it is overly complex and unbalanced. The symbolism is also not quite right as the two elements suggest divergence rather than community.

Narrowing in...

Our challenge was to embody this idea of arXiv as a place of connection in a visual that is also memorable and legally protectable.

Multiple directions/ideas are represented in this abstract chi. But they exploding away from their central anchor?

These two directions begin to intersect, but are not strong and cohesive.

The vertical arms imply a hierarchy of ideas, not what arXiv stands for.

Horizontal shapes are on an equal plane but look like opposing forces. We also drifted away from the chi.

These arms intersect and are joined, are a more cohesive single letterform, but are too busy visually.

These many directions led us to a mark that emphasizes collaboration and unity. This is our logo.

“This logo is not just unique and protectable; it captures the spirit of arXiv, a place where ideas come together and advance open science.”

Dmitry Krasny, Design Strategist

“As the role of arXiv in open science becomes more evident, it’s value should be made obvious lest we end up losing the system we cherish and rely upon so much.”

—Dr. Alberto Accomazzi, ADS Program Manager

The two arms of the chi link into one united symbol that embodies our northstar: arXiv is **a place of connection, linking people and ideas to the world of open science.**

The font is also unique and protectable, and references our roots in the earliest days of the internet.

It is a symbol that truly speaks to who we are.

Our Logo

Our mark, vetted and approved by Cornell University, achieves the legibility, memorability and legal defensibility arXiv needs.

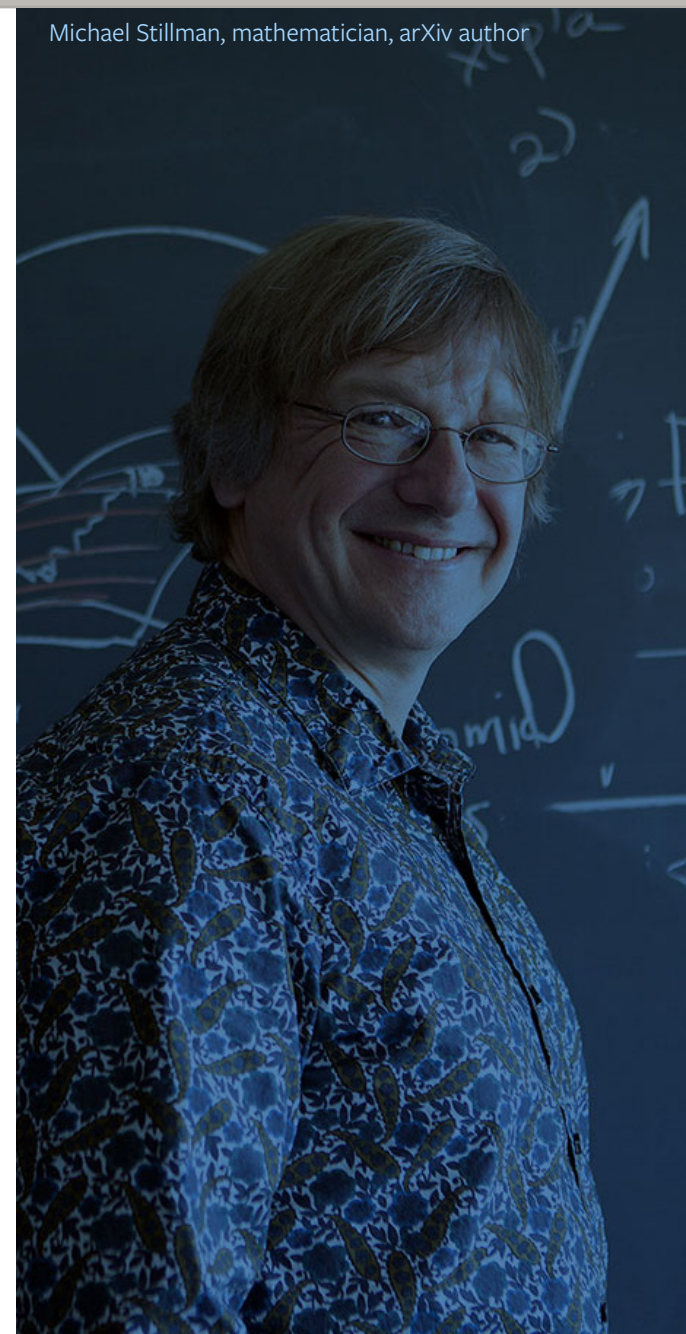

Our logo is ready to help us share a consistent, intentional, and meaningful message about who we are with the world.

That message is:

arXiv is a place of connection, **linking together people and ideas**, and **connecting** them with the world of open science.

Using our logo consistently and creatively will build up rich layers of meaning over time, and it's value to arXiv will increase exponentially.

Michael Stillman, mathematician, arXiv author

Looking to the future

Moving forward, arXiv will intentionally cultivate its brand to reflect its true nature as a professional, innovative tool, created by and for researchers.

Growth and Innovation

arXiv is committed to continue its success in leading innovation in scientific information sharing. Strengthening our identity will play an important role in achieving our ambitious goals.

“It is important that accessibility be considered at every stage so that everyone—no matter what their ability or technology they need to use—will be able to access arXiv.”

—Kara VanRoekel, Accessibility Consultant

Human collaboration on a global scale.

A fully **accessible** arXiv, flexible and adaptive.

Sharing of **interactive data** and results.

Unique resolvable **records that evolve with time**.

Open Science as the norm in research.

Collaborations that provide new discovery tools.

Bringing arXiv to **new fields and categories**.

Future-proof **archiving** and preservation.

Remaining free to researchers around the globe.

And, above all, **open to everyone**. Forever.

Our new home at Cornell Tech in New York City

Primary Logo

The logo should not be altered in any way, redrawn, used in an unspecified color or reproduced on a background that will impair its visual recognition.

Use of the name arXiv and associated logos, web addresses, and colors are only allowed with explicit written permission from the arXiv management team.

The arXiv logo looks to the future and nods to the past, with a font that pays homage to arXiv's birth in the 90's while also being forward looking.

The arms of the 'X' retain stylistic elements of the 'chi' in our name, with a lengthened top left and lower right branch.

Symbolically, the intertwining of the arms at the heart of the logo captures the spirit of arXiv's core value. arXiv is a place of connection, linking together people and ideas, and connecting them with the world of open science.

A clear area around the logo prevents any nearby graphic elements from interfering with the name's impact. This distance is the minimum amount of space that must surround the logo.

Create the clear area in proportion to the type size. The "X" represents the height the "a" in arXiv.

Logo color alternates

(2A) Light Variation for use over Dark Background

(2B) Single Color

(2C) Greyscale

Reference these alternate logos for specific editorial uses when our standard logo cannot be used, such as on a dark background, when red is not allowable, or for single color or grayscale applications.

Lockups

Lockups are used for internal arXiv projects with unique impact and a need for distinct branding, and for approved partnerships.

The primary lockup configuration should maintain spacing around the logo equal to the height of the 'a', as shown.

Alternate horizontal lockup 3b can be used when vertical space is at a premium, maintaining spacing equal to the height of the lower section of the 'a', as shown.

Brand Pillars

arXiv is an indispensable tool for the scientific community. Nevertheless it can be difficult to describe. These brand pillars drive our messaging.

Over the past 30 years arXiv has radically changed the way scientists interact with each other and do their research. The movement arXiv began is now an established part of the communications landscape, but arXiv has more to offer than low cost, instantaneous dissemination of articles: human **collaboration on a global scale**, sharing of **interactive data** and results, unique resolvable **records that evolve with time**, and much more. arXiv is committed to continue its success in leading innovation in scientific information sharing.

OUR CORE VALUE

Our core value has remained the same for three decades and can be summed in up just three words:

Open, above all.

Openness for arXiv is more than just Open Access. It is transparency, open mindedness, collaboration, and flexibility. The world has changed since arXiv was created in 1991, but throughout these changes arXiv remains your gateway to open science.

VISION

Our vision is for all researchers around the world to have immediate, free and open access to all established and emerging research in their field.

MISSION

arXiv is an open platform where researchers can share and discover new, relevant emerging science and establish their contribution to advancing research.

PASSION FOR SCIENCE

As a truly global organization, our community reaches all continents. We strongly believe that science is for everyone, and arXiv is committed to provide access to knowledge to everyone: no matter their country, gender, race or background. To prosper, science needs expertise, diverse ideas and the scientific method. arXiv brings these ingredients together without prejudice or fear.

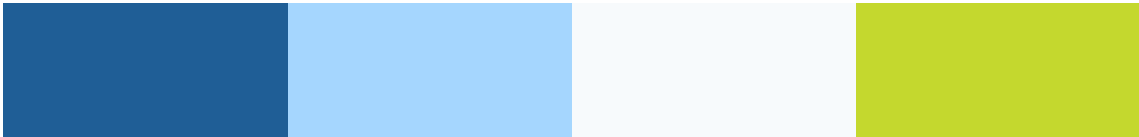

WE ARE A COMMUNITY

arXiv works thanks to a small staff and a very large, engaged, global community. Our institutional members, collaborators, moderators, authors, and readers are not passive recipients of arXiv's services -- they are arXiv. We value our community, and we strive to respond to its needs by cultivating meaningful relationships and creating opportunities for collaborative innovation.

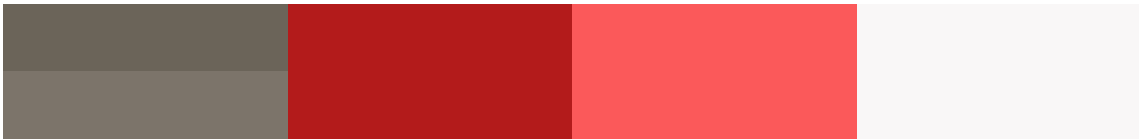

Colors

CMYK	55, 51, 60, 24	CMYK	21, 100, 100, 12	CMYK	00, 80, 59, 00	CMYK	02, 02, 01, 00
HEX	#6b6459	HEX	#b31b1b	HEX	#fb595a	HEX	#f9f7f7

(the lighter warm grey, #7c7469, is used exclusively for large fill areas)

To maintain a strong and consistent communication system for arXiv only certain specified colors may be used.

Bright colors are associated with positivity, while reduced contrast (achieved with background washes) is associated with nautrality and objectivity.

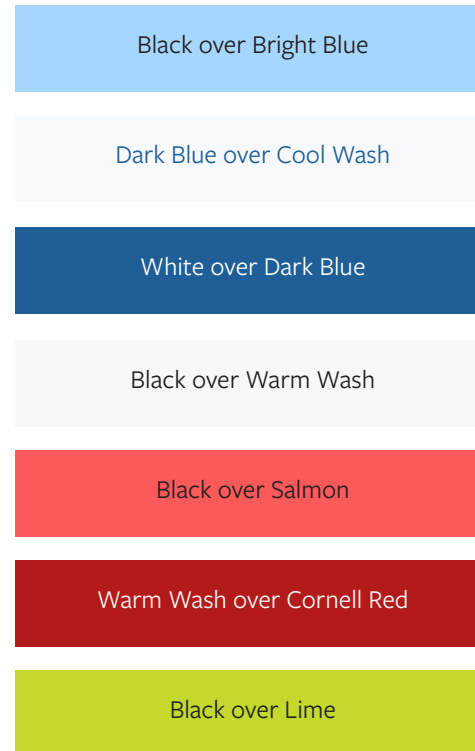

A note about Cornell Red: in web interfaces red signals errors. It’s also a color that causes visibility issues for those with color blindness. Therefore red should rarely be used as a text color on the web. However Cornell Red makes a bold statement, further connects us to Cornell University’s brand, and is a powerful stylistic element when used appropriately. Please visit the ‘Web Element Patterns’ section of this guide for examples of it’s use.

Why we need to stop saying “**arXiv has no competition.**”

The arXiv Voice

PERSONALITY

arXiv's personality has the potential to create emotional connections across our communities. It's also an important way to distinguish arXiv from its peers and competitors. arXiv's personality helps us decide how to present arXiv to various audiences.

tone

arXiv's tone is used to communicate our personality and can be described as conversational and direct. We communicate in as few words as possible with friendly, non-technical language whenever possible.

Researchers rely on arXiv for fast access to cutting edge work and archived articles, and our voice, tone, and language should reflect arXiv's important role in researchers' lives.

LANGUAGE

Communicating with consistent language and grammar is important to clearly reflect our professionalism.

arXiv's voice, tone, and language reflect our identity -- current and aspirational -- as an innovative and integral component of the world's research landscape.

Our voice can be summarized as reliable, innovative, and approachable.

How we describe arXiv

“I am honored to serve as the Cornell steward for arXiv because I so firmly believe in the mission: to serve science by making sharing of papers open, fast, reliable, and sustainable.”

Dr. Greg Morrisett, Dean of Cornell Tech

We communicate these messages in an approachable, open, and professional manner. Specifically, we cater to our diverse research community of readers, authors, and librarians at all career stages. We use clear language, we take concerns seriously, and we never minimize anyone’s struggles. Additionally, we honor and reinforce community connections by frequently quoting diverse and influential members of the arXiv community.

ONE LINER

arXiv is a curated research-sharing platform that empowers people around the world to read and contribute cutting edge work quickly in an open access environment.

OUR RELATIONSHIP WITH CORNELL TECH

arXiv is organized exclusively for educational and scientific purposes. It is part of Cornell University and reports organizationally to the Dean of Cornell Tech, who acts as arXiv’s steward.

THE THREE MAIN MESSAGES WE INTEND TO COMMUNICATE THIS YEAR

- ▶ arXiv is rock solid. arXiv’s strong technical, funding, and governance foundation reliably provides readers and authors an integral gateway to open science, all year long, across the globe. A significant part of this strength is drawn from our relationships with people and organizations in research and scholarly communications.
- ▶ Our value to authors is clear: more than 2 million articles contributed, and more than 2 billion downloads. Countless discoveries, connections, and synergies have been catalyzed in arXiv’s 30+ year history.
- ▶ We’re primed for growth and innovation. Ideas abound, and we have the structures and systems in place to prioritize and execute high impact innovation.

Pronunciation

SPEAKING OUR NAME

arXiv (/är kīv/) is pronounced like the word ‘archive’.

The ‘X’ in our name is the chi symbol used in mathematics, physics, and other fields. The chi is most accurately pronounced like the ‘ch’ in the scottish word loch, but in common use is pronounced like the english letter ‘k’.

Some people refer to it as ‘*the* arXiv’. Internally we do not precede the name with ‘the’, but this is a longstanding convention among some users and both are considered correct.

WRITING OUR NAME

arXiv is always written with a lowercase ‘a’ and a capitalized ‘X’. It is not preceded by the word ‘the’.

We know our spelling is a little unusual and we never correct someone who gets its wrong. We share the right pronunciation and spelling through example and repetition, not admonition.

We get it... pronouncing our name is not obvious! Following are the correct ways of saying and writing our name.

Images and Iconography

CORNELL PHOTOGRAPHY LIBRARY

This resource holds a wide variety of cleared images of people and campus locations.

arXiv Brand Slogan

We use the slogan “arXiv Connects” to highlight all the ways in which arXiv acts as a place of connection, a hub, for the scientific community.

The slogan is always displayed as light text on a black background, partially overlapping a colorized image. Images usually bleed off the edge on at least two sides. Content should be aligned with the edge of the image because the slogan is breaking out of the grid established by other content.
